

# Ravensbourne 2011

## Digital repository for teaching

- We have a blank canvas for an Open repository
- We want interactivity with all users
- We want staff & students to deposit Copyright correct content
- We want to offer reciprocal links with other Open repositories & develop our research profile

- New service to develop
- making the digital copies available through our Moodle VLE
- developing our repository as teaching resource to begin with
- Subject areas, visual arts, media, design, media communications, architecture, fashion
- Students already scan from Google & books to share amongst themselves. Not on VLE yet
- Students need more images than text
