[Mr Marcus Ramsden](#)

OneShare developer

School Of Electronics and Computer Science
University of Southampton

Expertise:

[javascript](#), [html](#), [css](#), [programming](#)

Biography:

Marcus is a young developer at the School of Electronics and Computer Science. He has been the lead on the Collection package over the last few weeks and he is fully enjoying it.

Qualifications:

Degree in cooking in 1999, MSc Chocolate Mousse in 2001 and PhD in the use of preservatives in wedding cakes in 2005.

Research Expertise

Fine Art – time-based media and the photographic arts.

Research Profile

Christy Johnson comes from a background in the Fine Arts, working with time-based media and the photographic arts. She has often chosen to work beyond the context of the gallery and has explored new platforms, contexts and sites for her practice, and relationships to diverse audiences. Johnson's work includes public art commissions, installation, museum intervention and bookworks. She has participated in the International Divers Memories project (Chris Dorsett) at the Pielisen Museum, Finland and the Manchester Museum in the UK.

Johnson's current research project *Feast* (in part funded by the AHRC, British Council and UCA) is an interdisciplinary work exploring the interface between the book, the archive, the screen and the museum. The work has three distinct components: photographic/text site-specific installation(s), video triptych (projection/dual monitor work) and a published artist's book distributed by Art Data, London. Three contributors to the afterword section of *Feast: Christy Johnson and 33 Confessors* include: Dr. Margherita Sprio (University of Essex), Dr. Catherine Clinger (University of New Mexico) and Dr. Jenny Daggars (Liverpool Hope University). The *Feast* project was previewed and launched on 26 April 2007 in the Oculorum Gallery / Project Space at the UCR California Museum of Photography in the USA. The book was launched in London on 20 September 2007 at the bookartbookshop and featured in Studio Space/Artist's Pages in *Vertigo Magazine* (Summer/Autumn 2007).

This research represents a convergence of three strands of inquiry: identity and the body, sites of memory, and the archive. It stems from Johnson's interest and previous work, which explored how the female body is socially and sexually constructed through transformative religious ritual. The work also draws upon her interests in contemporary practices of intervention and appropriation; collecting, re-collecting and the relationship of artefact and memory; and the archive as a site of reclamation and narration. Johnson is interested in the photographic document as a ritual space, and how the book form can become a site for discursive interplay. *Feast: Christy Johnson and 33 Confessors* operates as a set of interchanges between then and now, and reclaims a space for the reactivation of identity. www.feastproject.com

A new project in development continues Johnson's exploration and use of 'found' material (16mm wind tunnel footage). *Airborne* (Video/sound installation & dance intervention) explores the turbulence of suspension and sets out to map the interval between take off and landing. Windblown soil and non-diegetic sound create a journey 'between', a spatial dislocation. This work will be seen as part of the 7th L1 Contemporary Dance Festival, 4 – 9 March 2008, sited at the Babel/MultiArtCenter, MU Theatre and National Dance Theatre, Budapest, Hungary.

Helen Storey MBE, Professor of Fashion and Science, Co Director Centre for Fashion/Science

Overview

In Detail

Research Interests

- New technologies in the sciences and arts
- Emotional Literacy
- Cross-curricular tools for reaching new public audiences
- Human well-being
- Delivering new content to invigorate the National Curriculum
- New environmental solutions

Current Research

My work widely spans the arts, sciences and new technology fields. I produce projects which illuminate aspects of science

fields. I produce projects which illuminate aspects of science and well being in ways that directly interact with the public, with the broad aim of helping individuals reach their full creative potential. More recently I have begun to focus my creative energy on working in collaboration with other Universities to solve global problems.

Projects

Centre for Fashion Science

Fashion Science research aims to develop new fashion-related products and processes

Catalytic Clothing, Helen Storey

Catalytic Clothing is a project funded by the ESPRC and led by Helen Storey at LCF

Water Amnesty

Water Amnesty is a project which came out of the Free Radicals process

Wonderland

Helen Storey makes dresses disappear

Free Radicals

Interdisciplinary approach to innovation

Creative Lab

A new lab of learning in collaboration with Creative Partnerships

Water Amnesty

Water Amnesty is a project which came out of the Free Radicals process.

Please see: <http://www.arts.ac.uk/water-amnesty.htm>

The Universities of Sheffield, Westminster and UAL held water amnesty months in October and November 2009, with a supporting campaign of material and messaging, in order to save water across campuses. 50% of the saving was agreed to be passed onto ONE Water, to fund 'Playpumps' in Africa, which pump up 1,000 litres of clean and sustainable water an hour, through children's play on roundabouts. This initiative is therefore, also trialing a new relationship between Universities of the 1st world and developing countries, specifically, in this case, dealing with the inequity of a most basic human right - the right to clean water.

The Water Amnesty initiative came just at the right time for UAL for a further reason: having already implemented a 'Switch off' campaign for electrical points around the University's 33 campuses, Water Amnesty has enabled those same campuses to implement another vital resource-saving measure, in keeping with our drive to embed sustainable practice throughout university life - from the curriculum as a whole, down to a single water tap.

Water Amnesty was shortlisted for the Green Gown Awards in the Social Responsibility category for 2010. Water savings results are as follows: UAL 18%, Sheffield University 9%, Westminster 15%.

Survey Results/Approach

- All respondents have, or have had, staff research profile pages but most not very experienced with repositories.
- 10/10 have (or would like) a Web presence
- 8/10 have (or would like) a personal website
- Likes
- Dislikes
- Systems/sites used

the online resource for visual arts

Personal websites

- Advantage: personal creative space, no limits
- Disadvantage: remembering that the profile is ultimately an institutional online presence and control is important for authenticity

Social networking and other sites

- Advantage: lots of sites out there to get inspiration, visually attractive and can create a buzz
- Disadvantage: do researchers really want this? It has to last beyond fads

Online/Visual CV

- Advantage: saving researchers time, enabling re-use of data
- Disadvantage: the research profile can't be everything, this may be desirable but not as high priority as other enhancements

Profile page to include image or multimedia item that represents researcher e.g. could be item of research, photo of them, or short YouTube video

Title and copyright for image

In 'edit mode' the researcher will have an option to **download a copy of their entire research profile** (all three tabs) into one single document. Preferably editable, but if not then at least printable.

Each institution could create its own controlled keywords under **Research Interests**, for UCA this would be from AHRC.
